## PREVIEW EDITION OF THE YEAR-END 2025 NH SSR BOOK

Identifying, accurately quantifying, and predicting the top sires are the most critical issues for stallion owners, breeders, and their advisors working in the breeding sector of the thoroughbred industry. Our year-end Stallion Spectator Ratings (SSR) publication is entirely dedicated to addressing these questions and we have a variety of methods designed to answer them. Anybody can readily see who the top sires are just by looking at a list of stud fees and sires' progeny earnings lists but what's not so readily understood is how they can be accurately quantified. That's our mission.

We're working away on the Year-End 2025 Northern Hemisphere SSR book, final completion later this month. But time is always of the essence, so today we are sending out three sections of the book which we've completed. As always all our research features original, custom-designed statistics not available anywhere else with the intention of providing our subscribers with the best tools available to assist your decision-making process. In this Preview issue:

- **Yearly Progression Tables for Sires and Broodmare Sires.** Grouping sires by the year they had their first foals has been a feature of Bill's research going back to the days of the Racing Update newsletter over 40 years ago and provides the key to this analysis. Emily compiled lists of 50 historical top sires and 37 top broodmare sires and tracked their progression by year to establish historical benchmarks for the top sires and broodmare sires. Then we compare the records of current active sires (and broodmare sires) to see which sires are meeting or exceeding these benchmarks. Take the three younger (aged 11yo-13yo) Kentucky sires standing for \$200k+. Sires with six crops racing in 2025 are compared to the historical benchmarks of 25 A Runners and 10 G1/G2 winners; F2018 **Not This Time** ended 2025 with 67 A Runners and 21 G1G2 winners. For five crops racing the benchmarks are 20 A Runners/8 G1G2 winners; F2019 **Gun Runner** has 59 A Runners and 22 G1G2 winners. For sires with four crops racing the benchmarks are 15 A Runners/6 G1G2 winners; F2020 **Justify** has 47 A Runners and 11 G1G2 winners.
- **Sires With 4+ G1 Winners in 1<sup>st</sup> 4 Years of Progeny Racing.** We identified 58 top sires in the 26 sire crops beginning with sires with first foals 1998. Of these our research disclosed that nearly three-quarters of them (74%) had sired 4+ G1 winners by the end of the year their first 5yo's raced (so four crops racing), and moreover only two of the 43 failed to ultimately become top 20% sires, and 38 of the 43 (88%) became top 10% sires. In a business where the odds are always stacked against you, a 74% indicator for success is a trend worth following, even if often it doesn't qualify as bargain hunting because the market knows by then. Only four sires have had 8 or more G1 winners in their first four years: **Gun Runner** (10), **Frankel** (9), **Justify** (9), and **Galileo** (8).
- In November we sent out a preview edition covering sires who were then announced as retiring for 2026 with our original Sire Predictive Points (SPP) scores. Now we have updated those lists to cover 41 sires in Europe and Kentucky retiring in 2026, headlined by the two new Coolmore 9/9 sires, **Delacroix** and **Sierra Leone**.

## SECTION 1: SIRE AND BROODMARE SIRE YEARLY PROGRESSION- A LOOK AT STUD CAREER BY YEAR

We find these Yearling Progression Sire and Broodmare Sire tables to be most illuminating, particularly as we see how much the ‘super-elite’ sires stand out. As Emily details in her explanations of the tables, we’re able to compare sires at each year end both with their contemporaries who went to stud the same year but also against benchmarks established by 50 top historical sires and 37 top historical broodmare sires. Here are some highlights-

### Sires:

F2003: Against benchmarks of 135 A Runners and 36 G1G2 winners, the phenomenon **Galileo** had 319 A Runners and 129 G1/G2 winners – 98 of them Northern Hemisphere-bred G1 winners - at the end of 2025. Galileo has the largest number of A Runners and G1G2 winners of any horse in our database- If he’s not the G.O.A.T. his grandsire Northern Dancer is and he’s #2.

F2006: We first called them the ‘fearsome foursome’ 15 years ago. Against benchmarks of 130/34 3-time Champion Sire **Tapit** is 184/68. **Medaglia d’Oro** (165/43) and **Speightstown** (141/37) also exceed both benchmarks, and **Candy Ride** (119/37) also exceeds the benchmark for G1/G2 winners.

F2007: Darley’s best sire ever, against benchmarks of 125/32 **Dubawi** has 214 A Runners and 98 G1G2 winners, ranking him #2 to Galileo among sires who went to stud in the decade of the 2000’s.

F2010: Against benchmarks of 100/26, 7-time Champion Sire **Into Mischief** has 200 A Runners/57 G1G2 winners, while **Curlin** (126/41) also comfortably exceeds the benchmarks.

F2011: **Sea The Stars**, the second-best racehorse seen in Europe in the last 25 years, has 110 A Runners and 44 G1G2 winners against benchmarks of 90/24.

F2013: **Uncle Mo** smashed all records for a freshman sire when his first crop raced in 2015 and now has 124/32 against benchmarks of 75/20. **Wootton Bassett** (85/30) also exceeds the benchmarks. If we just looked at his two

Coolmore crops compared to the F2022 benchmarks of 5 A Runners and 2 G1G2 winners, those two crops include 33 A Runners and 14 G1G2 winners!

F2014: Against benchmarks of 65/18, the best horse to race in Europe in the last 25 years (and maybe ever), **Frankel** has 153 A Runners and 62 G1G2 winners – Galileo-like figures!

F2016: The second-best sire at Banstead Manor, against benchmarks of 45/14, **Kingman** has 87 A Runners and 26 G1G2 winners. **No Nay Never**, a specialist sire of early-maturing 2yo’s, has 25 G1G2 winners himself, from 53 A Runners.

F2018 – F2020: The three best new American sires in the 2020’s are F2018 **Not This Time** (67/21 vs benchmarks of 25/10), F2019 **Gun Runner** (59/22 vs 20/8), and F2020 **Justify** (47/11 vs 15/6). These are benchmarks for sires we class as ‘excellent’, so when these sires have double or more the benchmarks – well, that’s why they cost so much money to breed to – and so they should; they really are the ‘super-elite’.

F2022: Three American sires from this sire class have a lot to talk about: against benchmarks of 5 A Runners/2 G1G2 winners, **Vekoma** has 18 A Runners (a massive 17 of those 3yo’s last year) and 4 G1G2 winners; interestingly no G1 winners yet, but 4 G2 winners. **Tiz The Law** (14/5) looks very good, and **McKinzie** (8/3) has 3 G1 winners already. But as mentioned **Wootton Bassett’s** two Coolmore crops include 33 A Runners and 14 G1G2 winners.

### TOP 10 SIRES BY TOTAL NUMBER OF A RUNNERS

SIRE NAME	ST	FIRST FOALS	LAST CROP	TOTAL A	TOTAL G1G2

DANZIG	NA	1982	2005	170	75
MEDAGLIA D'ORO	NA	2006	2026	156	43

## Broodmare Sires:

The best sires generally make the best broodmare sires which these lists confirm:

F2003: **Galileo** 273/87 vs benchmarks 70/22.

F2004: **Street Cry** 108/40 vs 65/20. He was never talked about as much as some others but has been a highly influential broodmare sire, including recently Romantic Warrior and Rebel's Romance.

F2005: **Oasis Dream** 105/35 vs 60/18. Very good broodmare sire.

F2006: **Tapit** is proving to be a Champion Broodmare Sire with 126/37 vs benchmarks 55/16. **Medaglia d'Oro** (117/19) and **Speightstown** (76/16) also qualify to be called 'excellent' broodmare sires.

F2007: **Shamardal** (82/23) so far is ahead of **Dubawi** (70/22) vs benchmarks of 50/14 but surely Dubawi, still active even as a sire, will pass him in another year or two - but both excellent.

F2008: **Bernardini** (119/35), an A.P. Indy-line sire like Tapit, absolutely smashes it vs benchmarks of 45/12. Sovereignty and Nysos are among his most recent stars and he did do really well with another Darley sire, Street Sense, as that cross has produced Maxfield and Speaker's Corner as well as Chancer McPatrick, by Street Sense's son McKinzie.

F2011: **Sea The Stars** (49/19 vs 26/7) has looked a serious class broodmare sire for a while now. Interesting that **Fastnet Rock** (38/14 in the NH) has also done so well from his NH crops; he's been Leading Broodmare Sire in his native Australia the last two seasons.

F2012: In the best tradition of the Roberto branch of Hail to Reason line (he's by Arch, by Kris S., by Roberto), **Blame** (30/13 vs 23/6) is proving an excellent - and highly sought-after, with good reason - 'younger' (and still active) broodmare

sire. In 2018, Emily noted in her *Room on the Bandwagon* article that there "could be a chance to find bargains on better-bred fillies who might not bring the prices they would if the sire were otherwise more fashionable", and it's clear those well-bred early crops are maturing into good producers.

F2013: **Uncle Mo** (35-12 vs 19-5) has revived the Grey Sovereign branch of Nasrullah through Caro and is recently the damsire of 2021 foals Muth and Thorpedo Anna and 2022 foals Journalism and Nitrogen. Note that Uncle Mo's first four crops were bred from 'commercial' but not top mares and increased after he hit it big, so his pipeline is improving over time.

F2014: **Frankel** (20/4 vs 14/4): Let's wait and see where this goes; it's very early days yet and as a sire he keeps pace with his own sire, Galileo.

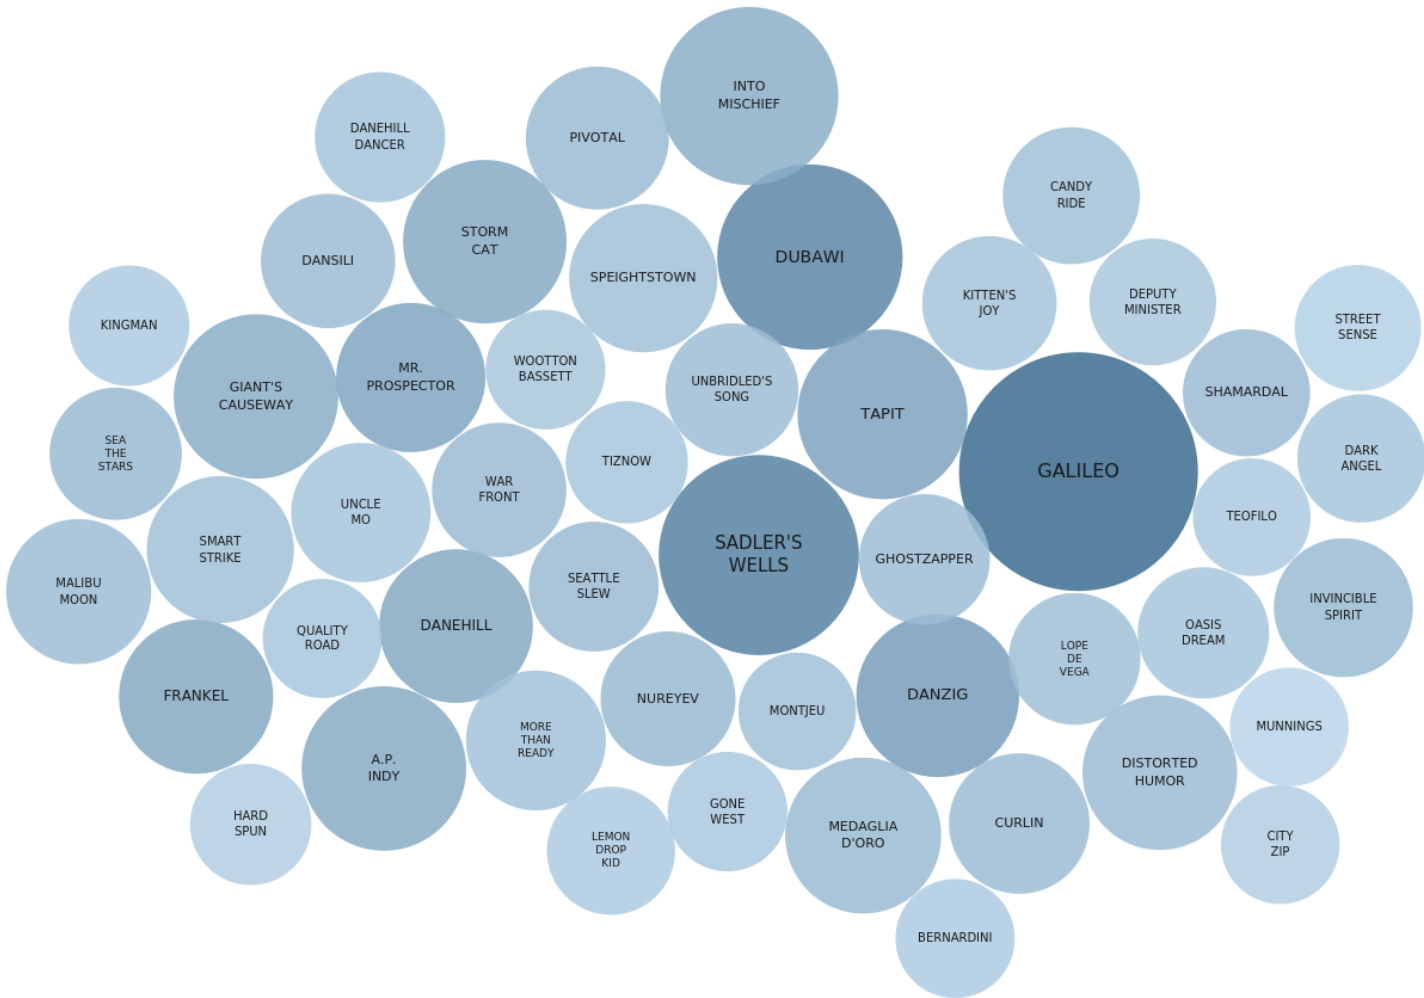

F2016: **Australia** (7/5 vs 5/2): with his oldest foals just 10yo this year Australia (also by Galileo, out of champion Ouija Board) has jumped out to a very good start as a broodmare sire including the G1W sprinter Lazzat, winner of the Maurice de Gheest as a 3yo and the Queen Elizabeth Jubilee S at Royal Ascot last year.

1.1: SIRE YEARLY PROGRESSION

In the following pages, we detail the career progress of stallions. We use a raw cumulative tally in this study instead of percentages, tracking performance not based on the crop in which a top runner was born but rather on the year in which they became an A Runner or G1G2 winner. After all, in the real world we experience a sire’s stud career in real-time, not by crop year. These tables therefore give a historical perspective of the stud career

The sires who are represented in the bubble graph, above, have the highest cumulative totals of A Runners of North American and European stallions in our database- they each have at least ~80+ A Runners as sires. The size of the bubble indicates number of A Runners, depth of color shade denotes G1G2 winners. We use the history of these top sires’ production as a sample comparison, along with the historical records of over 1,600 other sires who stood in North America and Europe to set benchmarks for how the younger sire classes are progressing.

The fifty sires profiled here are used as examples of the archival career progression of a sample of top sires. Comparing these sires to active crops helps benchmark the younger horses against the historical context. In the tables which follow, the ‘crop’ refers to the year the stallion is standing at stud- so for example when Sadler’s Wells was standing his fourth crop at stud, he had a total of 4 A Runners and 2 G1G2 winners by the end of that year. For reference, we’ve included the year of the sire’s first foals along with the year of his last Northern Hemisphere crop. The Total columns represent cumulative counts through December 31, 2025, and account for the total number A’s and G1G2 winners past what is represented on the table, as applicable. “Last Crop” listed in the tables denotes last known crop sired in North America or Europe for those horses who have died or been exported.

TEOFILO	EU	2009	-																																			

Comparing the statistics for the 50 proven sires in the table above to the population of A Runners and G1G2 winners in North America and Europe overall, note that the time frame for production as a sire begins when the sire is standing his fourth crop, as his first runners are then 2yo's. The highest percentage of A Runners are earned when a sire is standing his 5th, 6th and 7th crops at stud, getting around 10% of his total A's in each of those three crops, with over 50% of his A Runners to be tallied in the time before he stands his 10th crop. Although a sire does keep adding A Runners and G1G2 winners as he ages, only approximately 20% of A Runners are earned after a sire is standing his 14th crop.

The same general pattern holds true for ages at which horses become G1G2 runners, although the G1G2 winners are slightly older at first achievement vs A Runners. With the 5th through 9th crop each tallying ~8-9%+ G1G2 winners, just under 50% of G1G2 winners are earned before the sire stands his 10th crop, and about 80% of them win their first G1G2 before he stands his 15th crop.

## SIRES WHICH MEET (OR NEARLY MEET) BENCHMARKS FOR EXCELLENCE: NA-EU F1998-2022

The table below summarizes the findings from this line of research- these are the stallions who currently meet or (or nearly meet) the benchmarks for “Excellent” performance at this time in their careers, ranked by number of A Runners. **BOLD**= the sire has met or exceeded the benchmarks for both A Runners and G1G2 winners.

## 1.2: BROODMARE SIRES YEARLY PROGRESSION

In the following pages, we detail the career progress of stallions as broodmare sires. We use a raw cumulative tally in this study instead of percentages, tracking performance not based on the crop in which a top runner was born but rather on the year in which they became an A Runner or G1G2 winner. After all, in the real world we experience a sire's career in real-time, not by crop year. These tables therefore give a historical perspective of the broodmare sire career by year.

The sires who are represented in the bubble graph, above, have the highest cumulative totals of A Runners of North American and European stallions in our database- they each have at least ~100+ A Runners as broodmare sires. The size of the bubble indicates number of A Runners, depth of color shade denotes G1G2 winners. We use the history of these top broodmare sires' production as a sample comparison, along with the historical records of over 1,500 other broodmare sires who stood in North America and Europe to set benchmarks for how the younger broodmare sire classes are progressing.

In the following pages, we detail the career progress of stallions as broodmare sires. We use a raw cumulative tally in this study instead of percentages, because even though book size has changed dramatically in the modern era, the rate at which the modern sires produce A Runners and G1G2 winners through their daughters doesn't appear to be greatly different versus their small-book predecessors. It's difficult to tease out all the factors at play here, and while the younger stallions have had more opportunities with the greater number of daughters available for breeding, it's also possible that the increased concentration on more stallions may make it more difficult to stand out from the crowd.

The thirty-seven sires profiled below have at least 100+ A Runners as broodmare sires. We use the history of these sires’ broodmare production as a sample comparison for how the younger stallion ranks are progressing. In the tables which follow, the ‘crop’ refers to the year the stallion is standing at stud, or theoretical crop number if a sire is no longer at stud- he will continue accumulating A Runners and G1G2 winners long after he’s dead. For example, when A.P. Indy was standing his eleventh crop at stud, he had a total of 3 A Runners and 1 G1G2 winner as a broodmare sire by the end of that year. For reference, we’ve included the year of the sire’s first foals. The Total columns represent cumulative counts through Year-End 2025, and account for the total number A’s and G1G2 winners past the 22<sup>nd</sup> crop, as applicable.

Comparing the statistics for the 37 proven broodmare sires in the table above to the population overall, note that the key time frame for production as a broodmare sire comes with the sire's 8th crop- before this point, it is very rare to have any A Runners or G1G2 winners as a broodmare sire. The majority of A Runners and G1G2 winners are produced as a damsire when an active stallion is standing his 14<sup>th</sup> to 20<sup>th</sup> crops at stud, as detailed in the tables below.

## BROODMARE SIRES WHICH MEET (OR NEARLY MEET) BENCHMARK FOR EXCELLENCE: NA-EU F1998+

The table below summarizes the findings from this line of research- these are the stallions who currently meet or nearly meet the benchmarks for “Excellent” performance at this time in their careers as broodmare sires. **BOLD**= the sire has met or exceeded the benchmarks for both A Runners and G1G2 winners.

## FROM ANOTHER ANGLE: TOP SIRES BY NUMBER OF A RUNNERS & G1G2W PER CROP

Here's another way of measuring who the top super-sires are: the average number of A Runners and G1G2 winners per crop. In the Yearly Progression – Sires section we noted that **Wootton Bassett's** two Coolmore crops (foals of 2022-2023) have produced 33 A Runners (16.50 per crop) and 14 G1G2 winners (7.00); in both cases those results fit with the results for the two top sires (all crops) by average number of A Runners and G1G2 winners per crop. In both categories **Frankel** (10 crops) slightly edges out his sire **Galileo**: Frankel has averaged 15.30 A Runners and 6.20 G1G2 winners per crop; Galileo (21 crops) has averaged 15.19 A Runners and 6.14 G1G2 winners – so virtually the same. **Into Mischief** has averaged 14.28 A Runners per crop, **Dubawi** 12.58, F2019 **Arrogate** 12.33 for three crops (big loss), F2019 **Gun Runner** 11.80, F2020 **Justify** 11.75, **Uncle Mo** 11.27, and F2018 **Not This Time** 11.17. After Frankel and Galileo (and Wootton Bassett's two Coolmore crops), Dubawi has 5.76 G1G2 winners per crop, Gun Runner 4.40, Into Mischief 4.07, **Sea The Stars** 3.84, **Tapit** 3.78, and Not This Time 3.50.

## SECTION 2: GREAT INDICATOR: 4 G1 WINNERS IN 1ST 4 YEARS OF PROGENY RACING

\*Bubble size and color by number of G1 winners sired in first four years of progeny racing.

## NO NEW 2025 QUALIFIERS THOUGH 5 YOUNG SIRES IN CONTENTION IN 2026

Our research tells us that 38 of the 43 sires (88%) who had 4+ G1 winners by the end of the year their first 5yo's raced – an average of one G1 winner a year for their first four years of progeny racing – went on to become (if they weren't already by that time) top 10% sires, and 41/43 (95%) became at least top 20% sires – so it's a great pointer to the really top sires. We count 15 other top sires since 2000 who did not have 4+ G1W in their first four years of progeny racing, so we calculate there have been 58 'elite' sires in North America and Europe in the last 25 years, which averages out at 2.3 top sires per sire crop, of which 74% (43/58) had met the 4+ G1W/4 years target. In a world in which the odds are always stacked against success, a predictive rate of 74% is a huge pointer.

As F2020 sires **Justify** and **Good Magic** had already qualified and there were no other new qualifiers from later crops the table of 43 sires since 2000 who have had 4+ G1 winners in their first four years of progeny racing has only one change from last year's table: Justify had two new 3yo G1 winners in 2025 - Godolphin's Ruling Court, who subsequently died, won the G1 English 2000 Guineas and Coolmore's Scandinavia won the G1 English St. Leger. This gave him 9 G1 winners in his first four years with runners; only Gun Runner (10) has had more, Frankel also had nine, and Galileo had eight. With City of Troy having won the 2024 G1 Epsom Derby it also means Justify has sired the winners of all three English colts' Classics – quite an accomplishment.

Though there were no new qualifiers in 2025 there are five sires who each have 3 G1 winners and could still attain the 4+ G1 winners mark in 2026, four of them F2021 sires plus F2022 **McKinzie**, who had 2yo G1 winners Chancer McPatrick and Scottish Lassie and 2025 3yo G1 winner Baeza. F2021 sires **Blue Point** and **Too Darn Hot** still standing in Europe and **Omaha Beach** in the US each had 3 Northern Hemisphere-bred G1 winners by the end of 2025 and just need one more new G1 winner in 2026 to qualify by this elite standard. So does **Ten Sovereigns**, the G1 Middle Park and G1 July Cup winner from No Nay Never's first crop; he stood at Coolmore but was sold to Turkey before the 2025 breeding season, but subsequently had 3 G1 winners – all in the US - in 2025: 3yo's (from his second crop) Zulu Kingdom and Lush Lips, and G1 Breeders' Cup Juvenile Fillies Turf winner Balantina. Coolmore may well wish they'd sent their sire to Ashford instead of selling him to Turkey.

**SIRES WITH FOUR OR MORE GRADE/GROUP 1 WINNERS IN FIRST FOUR YEARS OF PROGENY RACING**

<b>38/43 (88%) of SIREs with 4+ G1 WINNERS by end of year 1<sup>ST</sup> 5yo's raced became Top 10% sires. (95% Top 20 sires)</b>

# CUMULATIVE NUMBER OF G1 WINNERS BY YEAR:

## 43 STALLIONS WITH 4+ G1 WINNERS 1<sup>st</sup> 4 YEARS

Looking in depth at the group of stallions profiled on the preceding page, here we detail the historical career profile of the point at which each sire earned each of their G1 winners. This table takes a snapshot of each stallion career and allows comparison of how many G1 winners each sire had by year-end of when their oldest foals were 5yos. **Gun Runner** leads all stallions in our database by number of G1 winners in the first four years of progeny racing with 10, surpassing **Frankel** & **Justify** (9), and even **Galileo** (8).

### SECTION 3: STALLION PROSPECTS TRACKING LIST- PREDICTING SIRE SUCCESS

It is always important to try to be ahead of the curve, and in this business there could be no better way to be ahead of the curve than to be able to predict the next successful super-sire. This became an even more important plank in breeders' strategy when we confirmed the 'age decline' in 11<sup>th</sup>-crop-plus sires, but predicting sire success is right at the top of everybody's wish list.

We first introduced our Sire Prediction Score, based solely on horses' race records, in our Mid-Year 2014 issue. As detailed below we identified nine criteria which had a positive correlation to sire success, and each sire scores a certain number of points out of nine. Though we detail below three deciles (10% ranges – top 10%, next 10%, next 10%), the shorthand version that we use is the sire's percentage chance of becoming a top 20% sire, which correlates to SSR scores of 70.00+. Very few sires score 9/9 – Coolmore's F2026 **City of Troy** was the first 9/9 since F2021 **Too Darn Hot** and the 13<sup>th</sup> overall, and this year Coolmore has two more 9/9 prospects, **Delacroix** in Europe and **Sierra Leone** in Kentucky. These sires, according to our research, had or have an 86% chance of becoming top 20% sires (and in fact 10 of the first 12, or 83% became top 20% sires, and nine of the 12, or 75%, became top 10% sires). Sires who score 7/9 or 8/9 have a 60% chance (they're 3 to 5 shots, give or take); sires who score 6/9 have a 42% chance (7 to 5). After that it drops down significantly.

\*Stud fee is in local currency, all other earnings metrics are in USD equivalent

Two important points: first, the general profile of the successful sire is they were top-level horses, more than once, as 3-year-olds. That's the general profile; it's by no means exhaustive. And that's the second point: this method will predict 60% of the good sires, for example 45 of the top 75 sires. But it won't predict the other 30, and they include, for example, Constitution, Not This Time, and Zarak. So it's also important – vitally important – to be able to recognize and utilize these horses when they do emerge. That's an important strategy component.

Though our original SSP 9-point scale emphasizes 3-year-old form, we know that the market often demands action on stallion prospects before we have the luxury of 3-year-old form. Besides, with 2-year-old form being such an important component of stallion valuation, we wanted to investigate the correlation between 2-year-old form and sire success. The answer is that it is useful, but the correlation is not as high as with our original 9-point model. There are seven points on the juvenile form scale; sires who score 6/7 or 7/7 have a 33% chance (2 to 1) of becoming top 20% sires (Into Mischievous, Wootton Bassett, Mehmas, and Blue Point

were among these), compared to 42% for 6/9 and 60% for 7/9 or 8/9. Also, though, we found that sires who score 6+ on both scales move up to have a 64% chance. For complete details on the 7-point juvenile form scale, please see the following page.

Subscribers will be familiar by now with the 9-point SPP analysis which we first introduced in the Mid-Year 2014 edition of SSR, and with the Juvenile SPP scale which we introduced in the Year-End 2018 edition. But we like to go back over the method and update the recent retirements and current stallion prospects in each issue.

The original 2014 SSR method utilizes nine criteria for evaluating a horse's race record, and the result is known as the 'Sire Prediction Points' (SPP) score. We use the top ~10% of stallions, as rated by SIRE score, as a target. Based on the record of these Top 10% stallions, benchmarks for racing performance are set. The nine criteria are as follows:

Criteria	Minimum Value	% of top stallions who meet this minimum
First Stud Fee	30k	52.9%
Earnings Per Start	100k	58.8%
Percentage on the Board	75%	79.4%
Racing CPI	30	73.5%
Second Highest Speed Figure	110 Beyer / 125 RPR	65.6%
Number of Grade 1 Wins	2	61.8%
Number of G1/G2 Wins as 3yo	2	47.1%
Earnings / Start @ 3yo	85k	58.8%
Dam CPI	9	58.8%
*Top stallions are defined as the top 10% of the sire population by sire points		

Each horse was evaluated to determine how many points they score on a scale of 0-9 to represent the nine criteria above. A sample of 344 established stallions (F1998-2008) was used as a model to determine retrospectively how many of the nine criteria each met. The results of that analysis are listed in the table below. We give odds of how likely a sire will be to rank in the top 10, 20, or 30% of sires. The general profile which emerges from this analysis suggests horses who show top form more than once, as a 3-year-old, have the best chance of sire success. For this scale we find the most pertinent description is that horses who score 7 or 8 points have a 60% chance of becoming a top 20% (roughly a Top 30 sire), and horses who score 6 points have a 42% chance. Below that they have to overcome the odds, though the juvenile analysis tells us horses who score 6/7 or 7/7 have a 33% chance of becoming a top 20% sire. On average only about one horse every 2.5 years scores 9/9 on our original scale, and they have an 86% chance of becoming a top 20% sire.

# Criteria Met by Category: 344 Sires F1998-2008											
Criteria Met	Total	Top 10% or better	%	Odds	Top 20% or better	%	Odds	Top 30% or better	%	Odds	
9	7	5	71	2 to 5	6	86	1 to 6	7	100	All	
7 or 8	35	13	37	1.7 to 1	21	60	2 to 3	26	74	1 to 3	
6	19	3	16	5.3 to 1	8	42	7 to 5	12	63	3 to 5	
2-3-4-5	104	8	8	12 to 1	17	16	5.3 to 1	33	32	2 to 1	
1	98	5	5	20 to 1	10	10	9 to 1	17	17	5 to 1	
0	82	0	0	'No Chance'	5	6	15 to 1	7	9	10 to 1	
TOT	344	34			67			101			

In the pages which follow, we review the horses retiring to stud in 2026 and how they score on the SPP scale. Keep in mind that for any horses still racing, points are subject to change. A horse can add points through top performances, or even lose points if his form slips. For details on our seven-point Juvenile Form SPP scale please see the next page.

## SIRE PREDICTION POINTS- JUVENILE FORM

Inspired by our subscribers to further explore the relationship between 2yo racing form and future success as a stallion, beginning on page 38 of our Year-End 2018 Northern Hemisphere edition we introduced a 7-point scale measuring Juvenile Form. Although this research concluded that our existing 9-point scale, which focuses most on 3yo form, is more accurate in predicting stallion success, assessment of 2yo form is one tool with which we can assess a stallion prospect. We use the top ~10% of stallions, as rated by SIRE score, as a target. Based on the record of these Top 10% stallions, benchmarks for racing performance are set. The seven criteria are as follows:

Criteria	Minimum Value	% of top stallions who meet this minimum
2yo Earnings	200k	86%
2yo Earnings per start	50k	64%
G1 Win @ 2yo	1	22%
G1 Win + G1-Placed @ 2yo	1	33%
G1G2 Wins @ 2yo	1	32%
Highest 2yo Speed Fig	90+	57%
2 <sup>nd</sup> Highest 2yo Speed Fig	86+	25%
*Top stallions are defined as the top 10% of the sire population by sire points		

Each horse was evaluated to determine how many points they score on a scale of 0-7 to represent the seven criteria above. A sample of 722 established stallions (F1998+) was used as a model to determine retrospectively how many of the seven criteria each met. The results of that analysis are listed in the table below. We give percentages of how likely a sire will be to rank in the top 10, 20, or 30% of sires.

### SEVEN VARIABLES EXAMINED RELATED TO JUVENILE FORM

CRITERIA MET	TOTAL	Top 10% or better	%	Top 20% or better	%	Top 30% or better	%
6&7	100	12	12%	33	33%	40	40%
4&5	76	7	9%	11	14%	17	22%
2&3	120	8	7%	16	13%	27	23%
0&1	426	39	9%	75	18%	115	27%
TOTAL	722	66	9%	135	19%	199	28%

We find that stallions who score 6+ points on both the standard 9-point Sire Prediction Scale and the 7-point Juvenile Form Prediction Scale have a particularly high chance of success- 16 of 25 stallions (64%) in our sample who achieved 6+ on both marks became top 20% sires, compared to a predicted success rate for that level of 42% for the 9-point scale and 33% for the 7-point Juvenile scale.

## SIRE PREDICTION POINTS RATINGS FOR 41 SIRES RETIRING IN NA/EU 2026

### THE CLASS OF 2026 (F2027); TWO NEW 9/9's FROM COOLMORE

In the 28 years between A.P. Indy's retirement to Lane's End in 1993 (F1994) and Too Darn Hot's retirement to Darley's Dalham Hall Stud in 2020 (F2021), only 12 horses had retired to stud having scored the maximum 9/9 on our original Sire Prediction Points (SPP) table. As we all know being able to forecast future sire success stories would be a massive 'buy' signal for breeders and stallion masters, but as we also all know the records are littered with highly promising failures as well as apparently unlikely success stories. Forecasting sire success is by definition a highly speculative business.

Having said that, when we devised, first, our original SPP scale and then later the Juvenile Form scale, our assessment was that sires who scored 9/9 on our original scale had an 86% probability of 'top 20%' (say Top 30 sires) sire success. In the event, of the 12 horses who went to stud with 9/9, ten (83%) have become top 20% sires, but perhaps even more significantly, nine of the 12 (75%) went on to become 'Top 10%', or even super-elite sires. For the record #10 was Dixie Union, who was a top 20% sire but not a super-elite sire. Incidentally, to dispel any thoughts of infallibility the two flops were spectacular failures: Henrythenavigator at Coolmore and West Coast at Lane's End.

Coolmore/Ashford and Lane's End were also, however, the two leading farms by number of the 12 sires which they stood: Coolmore (4) also stood Galileo, Giant's Causeway, and Montjeu, and Lane's End (3) also stood A.P. Indy and Dixie Union. Darley/Godolphin stood Bernardini and now stands Too Darn Hot. Juddmonte originally stood Empire Maker, the Aga Khan's Giltown Stud stands Sea The Stars, and Three Chimneys stands Gun Runner.

Since Too Darn Hot there have now been three new sire prospects to score 9/9 in the last two years and, probably not coincidentally, all three are Coolmore sires: **F2026 City of Troy** in 2025 and **F2027 Delacroix** and **Sierra Leone** to retire in 2026. They may have lost Wootton Bassett but they have a formidable arsenal of new top-class prospects. City of Troy, by Coolmore's new number one sire Justify out of G1 Fillies Mile winner Together Forever, by Galileo, emulated Too Darn Hot by scoring 9/9 on our original scale and 7/7 on the 2yo scale, winning four G1's including the Dewhurst as a 2yo, the Epsom Derby at 12f and the Eclipse and Juddmonte International at 10f and 10 1/2f respectively as a 3yo in 2024. Delacroix, by the only living true sire of sires

in Dubawi out of the superstar \$8 million racemare Tepin, won the 10f Eclipse and Irish Champion S., in the latter showing that devastating turn of foot that finishes off top-class fields in G1 races; and Sierra Leone, a \$2.3 million yearling, is by Gun Runner out of G1 winner Heavenly Love, by Malibu Moon, herself a half-sister to the G2-winning Congrats mare Forever Darling, the dam of Forever Young. Sierra Leone was never out of the first three in 14 career starts, winning three G1's, namely the Blue Grass and the Breeders' Cup Classic as a 3yo, and the Whitney last year and placing in six more G1's including the Kentucky Derby, Belmont, and Travers as a 3yo and running second to his cousin Forever Young in 2025's Classic, in which two grandsons of Debby Oxley's Deputy Minister mare Darling My Darling ran one-two.

Sierra Leone (top) and Delacroix (bottom) each score 9/9 on our Sire Prediction Points scale  
Photos courtesy Coolmore

There are a total of 14 sires going to stud this year who by our calculations rate as 33%+ probabilities to achieve top 20% sire success, and six of them are Coolmore or Ashford sires, plus two others they have raced and sold. Besides Delacroix, in Europe Coolmore is also retiring **Henry Matisse** (6/9 + 7/7 = 64%), winner of the 2024 G1 Breeders' Cup Juvenile Turf and the 2025 G1 French 2000 Guineas – he's by Wootton Bassett out of the top-class Immortal Verse, by Pivotal; and **Camille Pissarro** (6/7 as a 2yo = 33%), winner of the G1 Lagardere as a 2yo and the G1 French Derby as a 3yo and also by Wootton Bassett out of a Pivotal mare. Camille Pissarro

should just about get a bonus point as he is an absolute dead ringer for his sire. At Ashford in Kentucky, besides Sierra Leone they will also be standing **Fierceness** (8/9 + 7/7 = 64%), winner of the G1 Breeders' Cup Juvenile, Florida Derby, Travers, and Pacific Classic, second in this year's G1 Met Mile, and second and third in the last two editions of the G1 Breeders' Cup Classic. That's not a bad resume; and they are also retiring last year's G1 Breeders' Cup Juvenile winner **Citizen Bull** (7/7 as a 2yo = 33%), by Into Mischief out of a Distorted Humor mare – cross of Practical Joke and Life Is Good – and who gave Nysos a scare in the G1 Breeders' Cup Dirt Mile. Incidentally we do regard any sire with a 33%+ probability as one to be considered seriously: Into Mischief and Wootton Bassett both qualified as 33% chances, based on their 2yo form.

Darley is retiring **Rosallion** (7/9 + 7/7 = 64%), from Blue Point's first crop and winner of the G1 Lagardere at two and the G1 Irish 2000 Guineas and St. James's Place S. at 1m as a 3yo and placed in four 1m G1's last year as a 4yo. He didn't win a race in 2025 but that doesn't statistically hamper his prospects at all. He goes to Dalham Hall in Newmarket. Darley is also retiring **Shadow of Light** (by Lope de Vega, 7/7 as a 2yo = 33%), who won the G1 Middle Park – G1 Dewhurst double last year, to Kildangan Stud in Ireland. The only other horse who qualifies on 3yo+ form is Claiborne's new recruit **Mindframe** (by Consitution), who was second in the G1 Belmont S. and G1 Haskell last year as a 3yo and won the G1 Churchill Downs S. and G1 Stephen Foster this year; he scores 6/9 on our original scale, qualifying him as a 42% probability. Others who rate 33% chances based on their 2yo form are Spendthrift's **Chancer McPatrick** and Gainesway's **Locked** (Gun Runner) in Kentucky; Ireland's Ballyhane Stud's **Magnum Force** (Mehmas), winner of last year's G1 Breeders' Cup Juvenile Turf Sprint; and **Unquestionable**, from Wootton Bassett's last French crop and who won the 2023 G1 Breeders' Cup Juvenile Turf. He goes to Rathbarry in Ireland; and **Whistlejacket**, full brother to Little Big Bear and himself winner of the G1 Prix Morny as a 2yo, goes to Haras de Grandcamp in France.

#### AND ON DECK ... ANOTHER PROSPECTIVE 9/9

On page 25 you will find a separate list of prospects who have not yet been announced as retiring for 2026 or who their connections say they intend to keep in training in 2026. Foremost among them is none other than this year's Japanese-bred and -trained G1 Breeders' Cup Classic winner **Forever Young**, by Real Steel, who is himself by Deep Impact from the family of Kingmambo and Miesque, and out of the G2-winning Congrats mare Forever

Darling, as already noted a half-sister to Sierra Leone's dam. If Forever Young were to go to stud in 2026 he would be yet another 9/9 from what is clearly a terrific 2021 crop. Staying in training are US Horse of the Year **Sovereignty** (Into Mischief), who currently scores 7/9 (60%) on our original scale, and the runner-up 3yo **Journalism** (Curlin), who scores 8/9 (also 60%) and who will join the strong cast at Ashford when he does retire. In Europe Juddmote's top 3yo miler by Kingman, **Field of Gold** (7/9 = 60%) is scheduled to remain in training, as are three now-5yo's: Godolphin's G1 Breeders' Cup Mile winner **Notable Speech** (Dubawi) and **Ombudsman** (Night of Thunder) or the Wertheimers' **Sosie** (Sea The Stars). All currently score (6/9) and rate as 42% chances.
